Application Instructions

- Be sure all surfaces are clean and free of grease, dirt, dust, etc.

- Allow enough time (2-4 minutes or until dry to the touch) for the adhesive to become tacky before bonding. Parts should be mated with as much pressure as practical.
- Normal coverage required with web spray pattern is approximately 80% however, porous surfaces may need a second coat.
- Initial bond is strong enough to allow cutting or trimming immediately, although ultimate strength is achieved in 24 hours.
