

ForzaTM

BOND | A FORCE TO BE RECKONED WITH

Industrial

R190

Epoxy Adhesive

ForzaBOND® R190 two component 100% solids epoxy adhesive that cures at room temperatures, providing excellent adhesion.

Benefits

- Excellent resistance to Dynamic loads (vibrations and impacts).
- Good Mechanical properties.
- Moisture resistant.

Application Instruction

- A two part 1.3 : 1 mix ratio
- Ensure flow from both sides of cartridge is possible, attach static mixer and gun out material.
- Apply mixed adhesive to one surface to be bonded then mate second surface.
- Surfaces should be clean and dry free of dust and debris in most cases no abrasion or solvent wipe is necessary.

Applications

ForzaBOND® R190 is made to bond metal, wood, iron, porcelain, fiberglass, polystyrene.

Technical Data

Properties	Range		Units
	PART A	PART B	
Color:	1	8 MAX	Gardner Hellige
Viscosity:	11,500 – 13,500	50 – 150	Cps @25°C
Density:	1.16 – 1.17	0.96 – 1.00	g/cm³
Mixing Ratio:	1.3	1	In Volume
Pot-Life (350 ml):	5-70	50-70	Minutes

Precautions & Storage

- Must be stored in its original container, in a cool, well-ventilated place. Its temperature shouldn't be higher than 30°C. It should be kept away from any spark or fire.
- At least 12 months from the day of manufacture in the original tightly closed container at room temperature. Store away from excessive heat and moisture in closed containers. Do not refridgerate.
