

ForzaTM

BOND | A FORCE TO BE RECKONED WITH

Industrial

A729

Filter Bonding Adhesive

ForzaBOND® A729 is a high quality, fast setting resin emulsion adhesive, designed for laminating corrugate and other fibrous materials in high-speed production.

Benefits

- Good machinability
- Bonds some coated stock
- No ODS (Ozone Depleting Substances)
- No chlorinated solvents
- FDA approved for food packaging 21 CFR 175.105

Product Application

- Stir before using.
- May be applied by extrusion nozzle, or roller.
- Adhesive should be allowed to dry completely (until tacky and adhesive does not transfer) before packing or stacking filters.
- Film cleans up in warm soapy water or a mixture of acetone and water.
- Protect from freezing – this product is damaged by freezing.

Applications

ForzaBOND® A729 is specifically formulated for glued lap bonding corrugated, and carton sealing.

Technical Data

Solids:	40-50%
Viscosity:	1300 - 1400 cps
Appearance:	White liquid; dries clear
Base	Resin Emulsion
Weight:	8.9 lbs/g
Shelf Life:	12 Months

Sizes

5 Gallon Pail	Tote
55 Gallon Drum
