

ForzaTM

BOND | A FORCE TO BE RECKONED WITH

Industrial

H163

Hot Melt Adhesive

ForzaBOND® H163 is a fast setting box sealing hot melt adhesive.

Benefits

- Fast setting
- Meets FDA Food Packaging Requirements 21 CFR 175.105
- Fast setting on other fibrous material
- 15 second open time

Product Application

- ForzaBOND H163 can be dispersed through most hot melt systems with gun operating at 250–380°F.
- Apply to one side and mate the parts quickly, holding until set.
- Use of gloves for skin protection is recommended.
- **CAUTION:** Molten adhesive may cause burns to skin upon contact.

Applications

ForzaBOND® H163 is designed to adhere to nearly any surface. Box assembly with hand held hot melt guns. Assembly of drawer bottoms, cabinet backs, miter folding, etc.
