

Forza™

BOND | A FORCE TO BE RECKONED WITH

Industrial A465

Filter Coating Adhesive

ForzaBOND® A465 is a fast-setting, water-based, pressure sensitive adhesive used to coat air filters. Helps prevent “dusting” an engine by limiting dust intake into air filter.

Benefits

- High temperature resistance.
- No ODS (Ozone Depleting Substances)
- No chlorinated solvents
- Dried adhesive is permanently tacky
- Unlimited open time
- Non-hazardous
- Coated filters peel apart easily

Product Application

- Stir before using.
- May be applied by spray gun, extrusion nozzle, or roller.
- Adhesive should be allowed to dry completely (until tacky and adhesive does not transfer) before packing or stacking filters.
- Film cleans up in warm soapy water or a mixture of acetone and water.
- Protect from freezing – this product is damaged by freezing.

Applications

ForzaBOND® A465 is specifically formulated for bonding tack coating air filters and adhering or tack coating fabrics or fibrous materials.

Technical Data

Solids:	White
Viscosity:	3-6 months
Appearance:	45-50%
Base	25-30cps
Weight:	8.95 lbs/gal

Sizes

5 Gallon Pail	Tote
55 Gallon Drum
