

Thermal-Break Foam Tape

## **Benefits**

- High quality design assures long-lasting performance.
- · Reduce thermal transfer
- · High performance
- High performance cold weather adhesive

## **Product Application**

- Thoroughly clean contact surface before use.
- Remove the release liner and apply with care to the part to be bonded, ensuring that no air is trapped between the tape and the substrate.
- Apply with recommended application pressure of 15 pounds per inch of tape width.
- Once the tape has been applied, it cannot be removed and reused.
- Therefore, position tape carefully, assuring that it is in contact with all surfaces.
- If tape is misaligned, remove used unit, discard, and repeat application with new unit.
- Test product for system compatibility as individual application conditions can impact results.

## **Applications**

ForzaTAPE® R-T600 is specifically engineered for insulation applications, preventing thermal transfer between metals. It is ideal for use in metal building insulation, providing effective thermal protection in a wide range of environments.

## **Technical Data**

Application Temperature:	−34 to +250°F
Base:	Acrylic
Elongation:	39%
Functional Temperature:	0°F - 140°F
Hardness Range, Shore A:	15 - 25
Loop Tack:	115oz/in typical
Shelf Life:	12 Months
Thermal Condition (70°F):	0.24

Size

3/8in x 50ft
